

Animation Building!

An animation can be made by showing a **series of images**, with a sleep() in between, such as in

Each number represents one of the microbit's LEDs. Can you work out the pattern?

this example:

```
display.show(Image("11111:22222:33333:44444:55555"))
sleep(100)
display.show(Image("55555:66666:77777:88888:99999"))
sleep(100)
```

Use the grids below to design your animation!

Image(":: ::")	Image(":: ::")	Image(":: ::")
Image("::	Image(":: ::")	Image("::
Image(":: ::")	Image(":: ::")	Image(":: ::")
